# Contents

- 1. Introduction: why InformCare?**
- 2. How the InformCare platform was built**
- 3. What is in InformCare: resources and services**
- 4. Evaluation by users in three countries**
- 5. Final remarks**

# 1.Introduction: why InformCare?

# Support needs of informal carers in ageing societies

- Population ageing, a positive phenomenon in itself, leads often also to an increase in long-term care (LTC) needs
- As formal/professional care services are not able to meet (fully, but often not at all) this LTC demand, informal/family carers remain crucial in addressing (elder) care needs, thus relieving the pressure on public resources
- By doing this, however, carers often have to face **many difficulties**, e.g. health problems (depression, anxiety), lower work productivity (or even job loss), financial problems, family conflicts and social isolation
- To tackle such difficulties, in some countries different forms of **support services for carers** have been implemented

# Support services for carers: the increasing role of the web

An increasing number of support services for carers are being delivered via internet, in a static or interactive way, to provide the following:

- **Information** on different care-related aspects (static sites)
- **individual counselling** by health professionals to carers (via e-mail, audio or video communication)
- **group support** (**structured**: via video-conferencing group sessions with a moderator; **unstructured**: via on-line fora)
- **social participation tools** for interaction with other carers & significant others (via social networks etc.)

# Gaps in the provision of web-based support services for carers in the EU

Many web-based services for carers existing in the EU present substantial limitations (Schmidt et al 2011) as:

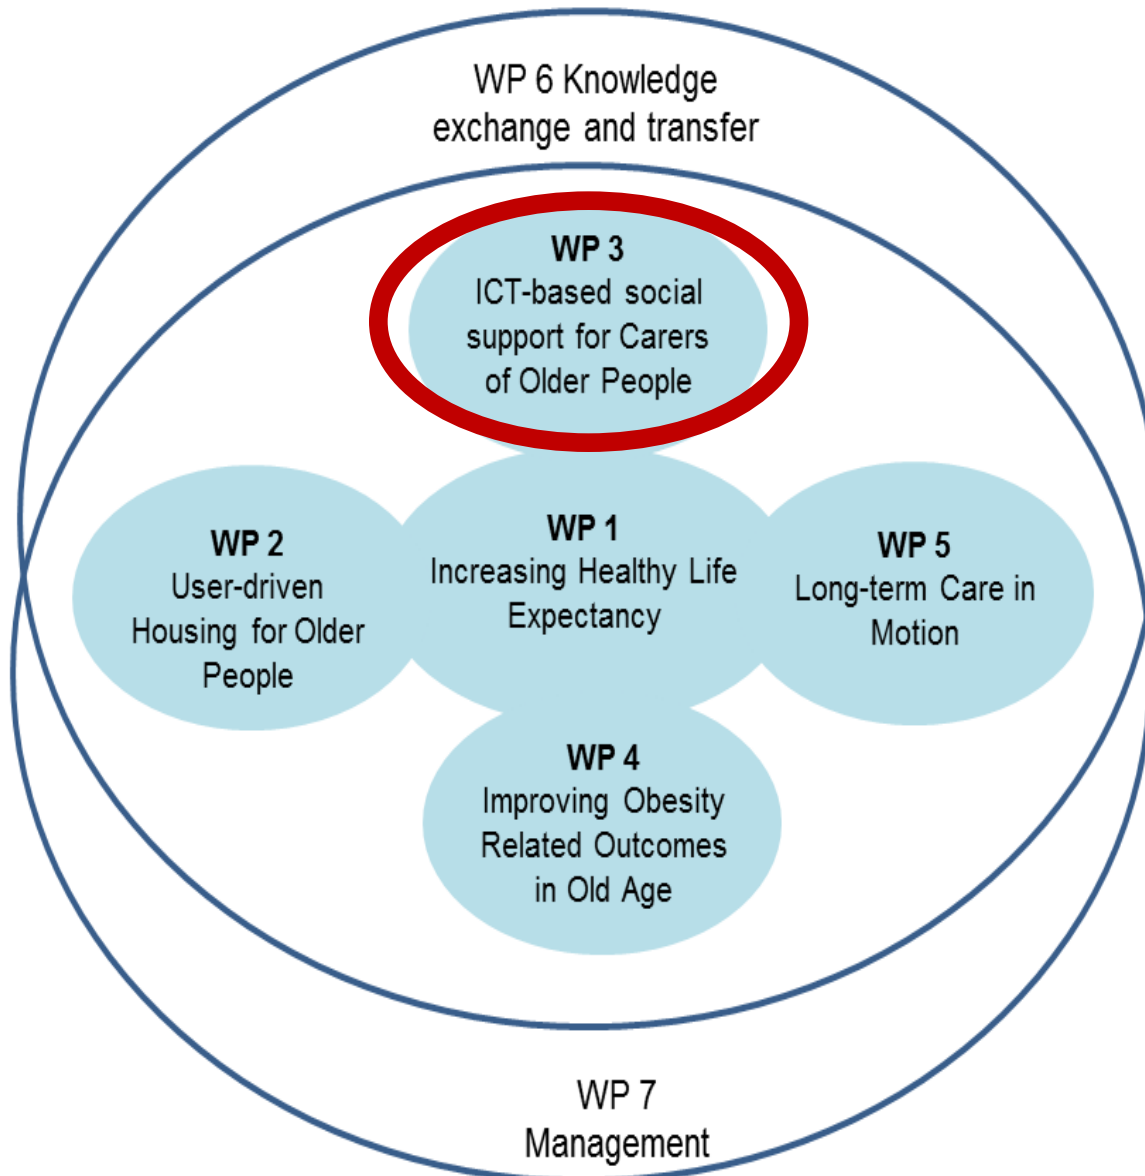

- many initiatives are **small-scale** and **low-funded**, with limited geographical coverage, so web-based services are available & accessible to few people only
- many countries in Europe experience (a) a **low penetration of low-cost broadband internet connection** and/or (b) a **small** (or even no) **cultural and social recognition** of carers' role (e.g. in Southern and Eastern Europe)

## **2. How the InformCare platform was built**

# The INNOVAGE project (WP3)

*innovAge*

SOCIAL INNOVATIONS PROMOTING ACTIVE  
AND HEALTHY AGEING

## Project Partners

1. University of Sheffield, UK (Coordinator)
2. Lund University, SE
3. Heidelberg University, DE
4. Newcastle University, UK
5. National Institute of Health and Science on Ageing (INRCA), IT
6. Age Platform Europe, BE
7. Eurocarers, LU
8. Sheffield Hallam University, UK
9. Latvian Council of Science, LT

# Goals of INNOVAGE-WP3:

## a multilingual platform for carers in the EU

- **Overall goal:** contribute to improving quality of life of informal carers of frail older people in Europe, by developing an integrated set of web-based, multilingual support services, to more effectively address carers' needs.
- **Specific objectives:** (1) to develop, (2) test (3) implement and (4) disseminate in the EU-27 the web platform with an integrated package of basic services.
- **Two main types of services:** information resources and interactive services

# Three target groups

- **Primary target group: Informal carers (all countries)**
- **Secondary target groups:**

**Care professionals (10 countries):** health care workers, psychologists, psychotherapists, social workers, adult educators etc., who directly interact with informal carers (e.g. to promote integration of formal and informal care, provide direct support etc)

**Employers (10 countries):** Owners, CEOs & HRMs organisations interested in addressing the potential difficulties (also on the workplace) experienced by the (growing number of) employees who provide informal care

# Three target groups

**COMMON  
CONTENTS FOR  
INFORMAL  
CARERS**

*ALL 27 EU  
MEMBER  
STATES*

# Design and development

A **user-centred approach was adopted** to design the platform and develop the services offered through it, based on:

- **a wide mix of user representatives: almost 200 end-users/experts** and **32 stakeholders** (mainly user organisations & research centres), including an **Advisory Board** of 15 experts
- **a series of user-centred development activities:**
  - **review** of most successful web-based services tested and implemented in Europe & beyond ( $\cong$  100 services reviewed)
  - **surveys** involving 58 selected experts, users and stakeholders, to get feedback on platform's main features
  - **preliminary round of user tests** to receive immediate feedback on prototypes of the platform
  - **pilot test** with 118 users in three countries (Germany, Italy & Sweden) for a more in-depth feedback and evaluation

# Implementation and dissemination tasks carried out by national organisations

## 1. Contents for **Informal Carers**:

- a. revision of translations of **common** contents
- b. development and uploading of **national** contents

## 2. Contents for **Care Professionals** and **Employers**:

- a. translation of **common** contents
- b. development of **national** contents

As a carer you may experience the psychosocial, physical and financial burden of caregiving. Help yourself section presents 4 main topics to help you cope with caring:

- Coping with caring
- Family and Care Reconciliation
- Work and Care Reconciliation
- Physical Exercise - Staying Active

Stress, depression, family relationships, balancing between care and work and tips to stay active are discussed in above sections.

**Remember, looking after yourself improves your quality of life and care!**

[Stage 3](#)

[Stage 4](#)

[Stage 5](#)

[Stage 6](#)

When you expect a child, the community (your family, friends, co-workers) rally around you and your spouse. When you expect your first child, you receive gifts, well wishes and the encouragement that you are entering a wonderful, albeit challenging, chapter in your life. As you prepare to welcome your child, you feel pride at the thought of your role as parent: How you will shape the mind of a youngster, impacting him or her with your wisdom, insights and knowledge.

Now think about a similar life experience, just one on the other end of the spectrum. An aging relative, a spouse, a parent, a grandparent, needs your help. And, you want to help—you believe in making the most of the years you have left together. But, when you tell your friends, your colleagues, even other family members, the comments you may hear are a far cry from well-wishes. “I could never do that! Why do you?” Or, the more common response: “Why don’t you just put your mother (or your wife, or your grandfather) in a nursing home? That way you won’t

11 novembre 2014

corrispondenza\_carers intervistati da Valentina  
NON FAR TROPPO CASO AL MIO TESTO, VOLEVA ESSERE QUANTO PIU' STIMOLANTE E PROVOCATORIO... PARE ABBIA SMOSSO QUALCOSA... AD OGNI MODO, TROVI LE LORO RISPOSTE SOTTO... Ciao a tutte! Come state? Spero tutte bene... Volevo ringraziarvi della vostra disponibilita' ad incontrare la nostra stagista, Valentina. Come vi siete trovate nel ruolo delle intervistate? E' andato tutto bene? Spero di si... Il ruolo del Caregiver sembra sta guadagnando piano piano piu' spazio e considerazione. Che ne pensate? Sono reduce da un meeting per il progetto INNOVAGE dove alcuni colleghi stranieri si meravigliavano del fatto che in Italia non ci sia un nome (italiano) specifico per il vostro ruolo. Il termine "caregiver", che noi usiamo, è preso in prestito dall'inglese... Sarà forse sintomo del fatto che il vostro ruolo non è riconosciuto e considerato come dovrebbe? che ne pensate? Spero di sentirvi presto! Buona serata e grazie ancora... Ananna Serenella Saracni 8 novembre Ciao Ananna. Carissima Valentina, mi ha fatto molto piacere trovare giovani che sono interessati e sensibili a certe problematiche sociali, mi fa sperare in un futuro migliore. Ciao a tutte, un abbraccio Roberta Martini 9 novembre Ciao Ananna. Ha ragione Serenella, Valentina, così carina e sensibile, fa proprio ben sperare. Mi auguro di essere stata utile. Per quanto riguarda il termine "caregiver", che in italiano non esiste, forse il suo equivalente è stato fin da sempre, di volta in volta, "figlia", "nuora", "sorella" o "moglie" (senza nulla togliere agli uomini che oggi si occupano di un familiare). Forse è proprio la nostra cultura che ha fatto rientrare il ruolo di "caregiver" nei doveri scontati di una "donna di casa", senza che nessuno si sia mai reso conto, almeno fino ad ora, di quanto sia pesante, impegnativo e per niente facile. Ma sono sicura che, prima o poi, anche l'Italia troverà il suo "nome specifico". A presto e un saluto a tutte! :)

[Home / Professionella](#)

### Betydelsen av anhörigomsorg

Anhöriga kan definieras på många olika sätt utifrån olika variabler såsom relationen till den närstående, ålder, kön, etnicitet och den närståendes behov. Eurocarers definierar en anhörig som en person som ger obetald vård, hjälp och stöd till någon med en kronisk sjukdom, funktionsnedsättning eller annat långvarigt hälso- eller vård- och omsorgsbehov, utanför en professionell eller formell ram.

### Juridiska aspekter för professionella som möter anhöriga i sitt arbete

Den rättsliga ställningen för den som är i behov av vård och omsorg regleras genom lagstiftning. För personal som arbetar inom vård och omsorg och socialt arbete finns det flera olika lagar som styr och påverkar arbetet. För personal som möter både enskilda och anhöriga är det naturligtvis viktigt att

### Att hantera vård- och omsorgspersonals belastning i arbetet

*"Jag har arbetat som socialarbetare på en dagverksamhet för personer med demens i fem år nu. Förra året vaknade jag en morgon och kände mig på väldigt dåligt humör och ville inte gå till jobbet. Så fort jag kom till jobbet kände jag mig utmattad och energilös, som om jag redan hade arbetat i flera*

# Carers' confidence with internet

# Usage of the platform

- Average **days of visits** varied from 5 in Italy to 23 in Germany, and average **time spent** surfing in the platform from 3 hours in Italy to over 7 hours in Germany and Sweden
- Most users preferred a **passive use** of services
- Among interactive services, the most successful was the **social network**, followed by the **forum**
- **Private messages** were a major communication channel in Sweden (over 70% of users sent/replied to messages) and used also in Italy and Germany
- **Chat** and **videochat** were the least used

# Adequateness, usability and barriers

- Carers in all three countries appreciated the adequateness and usefulness of **information provided** from project staff through the platform
- Some **passive users** reported that even simply **to know** they could get any time support **via the interactive services** of the platform was a **positive, reassuring feeling**
- Overall scores of **global usability** were satisfactory, albeit some Swedish carers were concerned about helpfulness and efficiency of the platform
- This was to a large extent related to **technical problems** during the pilot phase, affecting especially Swedish and Italian users (25% and 20% of cases, respectively)

# 5. Final remarks

# Main achievements of InformCare...

- A set of both common and country-specific support services for carers, available for free via internet in **32 versions, 27 EU countries** and **23 languages**
- **Contents' quality and user-centeredness** has been ensured via a systematic involvement of **final users and stakeholders** through countless **contacts** (e-mails, skype and phone calls) over 2 years, and a 3-month field phase
- More than **2,500 web pages** of contents specifically produced to address **informal carers' needs** & over **300 web pages** for **care professionals** and **employers**
- **For some countries, this kind of web-based support is available in local/national language for the first time!**

# InformCare's potential for the future

- **Additional versions**, countries and languages can be added at any time via Eurocarers
- **Adaptation** and **update** of contents in each version can occur according to national/local needs
- Wide choice of what **interactive services** to provide
- Possibility to become a **national information hub** for carers, employers and care professionals
- Potential for strengthening a **Europe-wide network of stakeholders** active and interested in supporting, lobbying and advocating for carers
- **A powerful tool to promote the adoption of EU-wide policy measures to better support carers!**

# Thank you!
